

## **SAVE Fuel – Why hasn't the Public Acted to Save Fuel by Reducing Pollution – ECOFuelMax**

Those who use Gasoline have experienced +/- 15% in Fuel Savings with increased power. Diesel owners can Save +/-8% in Fuel and reduce REGEN Cycles, DPF Maintenance and DEF as much as 73%.

**WEST PALM BEACH, Fla. - Jan. 30, 2023 -**  
*PRLog* – Our Government leaders are aware and have been using the ECO Fuel System on Tens of Thousands of Government Vehicles for over 10 years. Reducing Millions of tons of Greenhouse Gases and Carbon Pollution/Particulates in the Public's best interest. Transit Buses, Trucking and Diesel Heavy equipment are saving thousands of dollars annually; the ECO's ROI is +/-30 days. It may take years before Electric vehicles are feasible and affordable.

Unfortunately the private sector has been misinformed. You do not have to buy an electric vehicle to reduce Pollution and Save on Operating Expenses. To create the Batteries we buy from China for Electric Vehicles, it may increase Carbon Emissions, not lower them. An Electric Car cost is a minimum of \$45,000; the cost for an ECO Fuel Saver is only few hundred dollars (+/- \$400) and will pay for itself in +/-30 days, while reducing Greenhouse Gases (+/- 70%) IMMEDIATELY. No Chemicals or Maintenance is required, no warranty issues. It only treats Fuel, no motor modifications. The ECO Fuel System is a Patented and Guaranteed product (BBB A+) that works based on the principle of electrolysis, it can last 20+ years.

By increasing the Reid Vapor Pressure in all fuels, it increases the combustibility causing Diesel, Bio Diesel and Gasoline to burn cleaner and more efficiently. Diesel/Biodiesel motors can reduce REGEN Cycles +/-70% and save +/-8% in fuel, while reducing Maintenance and Downtime. Gasoline motors save fuel, +/-15% and have increased power, due to fuel burning cleaner and more efficiently.

The proven ECOFuelMax Pollution Solution aka the ECO Fuel System is Guaranteed and has been BBB A+ rated for over 10 years. The Public, Companies and our Government could help to reduce Fuel Consumption and Carbon Pollutants/Greenhouse Gases 40% to over 70%, IMMEDIATELY! Tell your Representatives and spread the word, we need to ACT!

The money being spent by our Government on research to find solutions to reducing Carbon Pollution/Particulates may be wasted Taxpayer Dollar grants to local Municipalities. There is an unmatched to date proven opportunity available NOW, go online and read the Reviews & References (<https://ecofuelmax.com/product-reviews>). For more information Call, Email or go Online.
